

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

v. S.H. 1827

TIME TABLES,

ON

A NEW CONSTRUCTION,

WHEREBY

Four Hundred Calculations

MAY BE MADE

IN ONE HOUR.

By WILLIAM SHACKLETON,

AUTHOR OF THE MENTAL CALCULATOR.

These Tables are to facilitate the Finding any number of Days to any given Period, and will be found peculiarly useful to Bankers, Merchants, and all such as have Interest Accounts to state or examine.

LEEDS:

PRINTED BY CHRISTOPHER PICKARD,

AND SOLD BY THE BOOKSELLERS IN LEEDS AND BRADFORD; AND
BY THE AUTHOR, VICAR-LANE, BRADFORD.

1825.

PRICE TWO SHILLINGS.

ENTERED IN STATIONERS' HALL, IN TERMS OF THE ACT
OF PARLIAMENT

Every Copy of this Work is signed by the Author's own
hand, as under,

Wm Shackleton

ADVERTISEMENT.

—◆—

THE Twelve Tables at the end of the Work, are for the ready finding of any Number of Days to any day throughout the year, and this may be done with ease and despatch, by all such as are in the habit of stating Interest Accounts.

For example ;—Supposing an Account is to be made up to the 31st of December, refer to the month of December, and in the column under the 31st you will find twelve numbers corresponding to the twelve months, that is to say, against January, stands 334 ; against February stands 306, and so on ; if they were put down on a slip of paper, they would appear thus ;

DECEMBER 31.

January	334
February	306
March	275
April	245
May	214
June	184
July	153
August	122
September	92
October	61
November	31
December	365

Suppose then, in this Account a number of Bills became due as follow ;

Bill 20th of January to the 31st of December,	345 days.
Bill 20th of July	164 days.
Bill 30th of August	123 days.
Bill 29th of September	93 days.
Bill 16th of October	76 days.
Bill 17th of November	44 days.

For the first Bill reckon 11 days, because from the 20th of January to the end of January are 11 days, then add 11 to the Tabular Number against January, and the sum will be 345 ; again, for the second Bill add 11 days, because from the 20th of July to the end of July are 11 days, add these to 153 the Tabular Number for July, and the sum will be 164 ; for the third Bill add 1 day to 122, the Number corresponding to August, and the answer will be 123.

These Examples it is presumed will be sufficient to familiarize the Method; and the Author would only add, that in the way set forth, he has been enabled to make 400 calculations within the hour; to prove this fact, let any one, at all conversant with Interest Accounts, take down on paper or commit to memory the twelve Tabular Numbers before mentioned, and he will find with what facility and rapidity he can compute any Number of Days to the 31st December, the usual period to which open accounts are calculated.

W. S.

VICAR-LANE, BRADFORD, }
Dec. 10th, 1825.

A TABLE,

Shewing by inspection the Number of Days from any Day in any Month to the same Day in any other Month.

JAN.		FEB.		MARCH.		APRIL.		MAY.		JUNE.	
Feb.	31	March	28	April	31	May	30	June	31	July	30
March	59	April	59	May	61	June	61	July	61	Aug.	61
April	90	May	89	June	92	July	91	Aug.	92	Sept.	92
May	120	June	120	July	122	Aug.	122	Sept.	123	Oct.	122
June	151	July	150	Aug.	153	Sept.	153	Oct.	153	Nov.	153
July	181	Aug.	181	Sept.	184	Oct.	183	Nov.	184	Dec.	183
Aug.	212	Sept.	212	Oct.	214	Nov.	214	Dec.	214	Jan.	214
Sept.	243	Oct.	242	Nov.	245	Dec.	244	Jan.	245	Feb.	245
Oct.	273	Nov.	273	Dec.	275	Jan.	275	Feb.	276	March	273
Nov.	304	Dec.	303	Jan.	306	Feb.	306	March	304	April	304
Dec.	334	Jan.	334	Feb.	337	March	334	April	335	May	334
Jan.	365	Feb.	365	March	365	April	365	May	365	June	365
JULY.		AUGUST.		SEPT.		OCTOBER.		NOV.		DEC.	
Aug.	31	Sept.	31	Oct.	30	Nov.	31	Dec.	30	Jan.	31
Sept.	62	Oct.	61	Nov.	61	Dec.	61	Jan.	61	Feb.	62
Oct.	92	Nov.	92	Dec.	91	Jan.	92	Feb.	92	March	90
Nov.	123	Dec.	122	Jan.	122	Feb.	123	March	120	April	121
Dec.	153	Jan.	153	Feb.	153	March	151	April	151	May	151
Jan.	184	Feb.	184	March	181	April	182	May	181	June	182
Feb.	215	March	212	April	212	May	212	June	212	July	212
March	243	April	243	May	242	June	243	July	242	Aug.	243
April	274	May	273	June	273	July	273	Aug.	273	Sept.	274
May	304	June	304	July	303	Aug.	304	Sept.	304	Oct.	304
June	335	July	334	Aug.	334	Sept.	335	Oct.	334	Nov.	335
July	365	Aug.	365	Sept.	365	Oct.	365	Nov.	365	Dec.	365

Example.—How many Days are there from the 4th of February to the 4th of September? Find February in the Head-Line, then look down the Column, and against September stands 212, the number of Days required.

If the given Days are different, it is only adding or subtracting their inequality to or from the Tabular Number. Thus, from the 4th of February to the 8th of September will be four Days more than 212, viz. 216; or from the 8th of February to the 4th of September will be four Days less than 212, viz. 208.

N. B.—If the time exceeds a year, 365 Days must be added. Thus, from the 4th of February, 1824, to the 4th of September, 1825, will be found to be 577 days, the sum of 212 and 365.

A TABLE

FOR MAKING UP A YEARLY ACCOUNT,

Shewing the Number of Days from any Day in the Year to the 31st of December.

D.	Jan.	Feb.	Mar	Apr.	May	Jun.	July	Aug.	Sep.	Oct.	Nov	Dec.

23	23	54	82	113	143	174	204	235	266	296	327	357
24	24	55	83	114	144	175	205	236	267	297	328	358
25	25	56	84	115	145	176	206	237	268	298	329	359
26	26	57	85	116	146	177	207	238	269	299	330	360
27	27	58	86	117	147	178	208	239	270	300	331	361
28	28	59	87	118	148	179	209	240	271	301	332	362
29	29		88	119	149	180	210	241	272	302	333	363
30	30		89	120	150	181	211	242	273	303	334	364
31	31		90		151		212	243		304		365

Example.—Is a Bill due the 13th of March, how many Days of Undue Interest are there upon it? *Ans.* 72.

Proof.—Find the given Day in the first Column, then against it under March is 72, the answer.

N. B. If the Days required include the latter part of February, in Leap Year, one is to be added to the Number found in the Table.

A TABLE

FOR MAKING UP AN ACCOUNT TO THE 30th OF JUNE,

BEING THE

FIRST HALF YEAR.

DAYS.	JAN.	FEB.	MARCH.	APRIL.	MAY.	JUNE.

Example.—Would you know the Number of Days from the 5th of July to the 31st of December? *Ans.* 179.

The Table on the 7th Page will serve as an Undue Table for this.

TIME TABLES,

For Computing the Number of Days, to any given Period.

Although these Tables contain 4380 calculations, yet no more than thirty-three figures will be required for making up an Account to any day in the year.

It may be necessary to state in order to prevent mistakes, that if in adding a Number of Days to any Tabular Number, the sum is more than 365 Days, in this case the surplus of Days need only be reckoned providing the time does not exceed a Year; but when the Time exceeds a Year, the whole Number must be reckoned.

A LIST OF STAMPS FOR INLAND BILLS AND PROMISSORY NOTES,

Payable to Order, after Date, or Sight, or to Bearer on Demand,

NOT RE-ISSUABLE.

	Not exceeding Two Months Date, or 60 Days Sight.	Exceeding Two Months after Date, or 60 Days after Sight.
Amounting to 40s. and not exceeding 5l. 5s.	£0 1 0	£0 1 6
Exceeding 5l. 5s. and not exceeding 20l.	0 1 6	0 2 0
Exceeding 20l. and not exceeding 30l.	0 2 0	0 2 6
Exceeding 30l. and not exceeding 50l.	0 2 6	0 3 6
Exceeding 50l. and not exceeding 100l.	0 3 6	0 4 6
Exceeding 100l. and not exceeding 200l.	0 4 6	0 5 0
Exceeding 200l. and not exceeding 300l.	0 5 0	0 6 0
Exceeding 300l. and not exceeding 500l.	0 6 0	0 8 6
Exceeding 500l. and not exceeding 1000l. ...	0 8 6	0 12 6
Exceeding 1000l. and not exceeding 2000l. ...	0 12 6	0 15 0
Exceeding 2000l. and not exceeding 3000l. ...	0 15 0	1 5 0
Exceeding 3000l.	1 5 0	1 10 0

The Number of Days in each Calendar Month, is as follows:—

January.....	31	July	31
February	28	August	31
March	31	September.....	30
April.....	30	October.....	31
May	31	November.....	30
June	30	December.....	31

The following Lines may assist the memory in recollecting them ;

Thirty days hath September,
 April, June, and November ;
 February hath twenty-eight alone,
 And all the rest have thirty-one ;
 Except Leap-year, then 's the time,
 February's days are twenty-nine.

To find Leap-year, divide the year by 4, if nothing remain, it is Leap-year ; but if 1, 2, 3, remain, it is so many years after. The following then will be Leap-years, 1828, 1832, 1836, 1840, 1844, 1848, 1852, 1856, 1860, &c

NOTED DAYS FOR PAYMENT OF RENTS, &c.

Candlemas, February 2nd,	Michaelmas, Sept. 29th,
Lady-Day, March 25th,	Martinmas, Nov. 11th,
Midsummer, June 24th,	Christmas, Dec. 25th.
Lammas, August 1st,

THE
MENTAL CALCULATOR:

OR

Approved Practical Methods

FOR SPEEDILY CALCULATING, BY THE MIND ALONE,

ALL CASES OF

INTEREST,

Brokerage, Commission, &c.

BY WILLIAM SHACKLETON,

LATE BANKER'S CLERK.

Leeds:

PRINTED BY CHRISTOPHER PICKARD,

AND SOLD BY ALL THE BOOKSELLERS IN LEEDS; W. H. BLACKBURN, BOOK-
SELLER, AND W. SHACKLETON, VICAR-LANE, BRADFORD.

1825.

234

**THIS BOOK IS ENTERED IN STATIONERS' HALL, IN
TERMS OF THE ACT OF PARLIAMENT.**

ADVERTISEMENT.

THE Author would introduce this pocket volume, by stating, that his own individual experience, while engaged in the minutiae of a country bank, convinced him of the necessity of promptly deciding cases of Interest, Commission, &c. without having recourse to printed Tables and other helps of that description; how far he has succeeded is left for an impartial public to determine;—he has endeavoured to render it intelligible to all, and if it be found of use in facilitating commerce, it will answer his motives in undertaking it, and give him great pleasure and satisfaction.

Uncommon pains have been bestowed in attending the press, to prevent any errors in the figure part, and the whole has been examined by a gentleman of known abilities, to whom he considers himself greatly obliged, as well as to those gentlemen who have kindly honoured him with their names as subscribers to the work.

W. S.

VICAR-LANE, BRADFORD, }
June 6th, 1825. }

BROKERS

Are persons who conclude bargains between Merchants and others, in matters of Money or Merchandise; thus, there are Ship-Brokers, Insurance-Brokers, Exchange or Bill-Brokers, Stock-Brokers, &c.

Brokerage or Brokers' Commission

A TABLE,

Shewing in what Time any Principal or Sum of Money will Double itself at Simple Interest being Lent out at any of the following Rates :

Rate of Int.	Years.	Rate of Int.	Years.
2	50	5	20
$2\frac{1}{2}$	40	6	$16\frac{2}{3}$
3	$33\frac{1}{3}$	7	$14\frac{2}{7}$
$3\frac{1}{2}$	$28\frac{2}{3}$	8	$12\frac{1}{2}$
4	25	9	$11\frac{1}{3}$
$4\frac{1}{2}$	$22\frac{2}{3}$	10	10

Example.—Any Principal will Double itself at Five per Cent. in Twenty Years: proved thus, divide 100 by the rate of Interest; $5 \overline{)100}$

Ans. 20 years; or refer to Commission at Five per Cent. and look for an even Pound in the Interest Column, the Principal standing against that Pound, denotes the number of Years it takes: when an even Pound is not immediately in the Tables, take the Interest of any two numbers that will make up that Sum; as, in the Table of Commission at Four per Cent.—20 and 5 will make a Pound.

INDEX

To the foregoing Fifty-Six Tables of Brokerage, and Commission; shewing the Page where each may be found.

Per Cent.	Page.	Per Cent.	Page.	Per Cent.	Page.	Per Cent.	Page.
$\frac{1}{10}$	1	$\frac{1}{10}$	9	$2\frac{1}{2}$	16	$4\frac{1}{2}$	23

.....	7	$2\frac{3}{4}$	14	$4\frac{3}{4}$	21	13.....	28
.....	7	$2\frac{7}{8}$	15	$4\frac{7}{8}$	22	14.....	29
1.....	8	$2\frac{7}{8}$	15	$4\frac{7}{8}$	22	15.....	29

INTEREST

Is a Premium paid or allowed for the Loan or Use of Money: in England, the Legal Interest is Five per Cent. or One-Twentieth part of the Sum, which is one year's Interest of it, and this is the highest Rate of Interest that can be taken. The following are

FORTY COMPENDIOUS TABLES

OF

INTEREST AT FIVE PER CENT.

shewing at one Reference, the Interest of any Sum from One Shilling to Twenty Thousand Pounds, for any number of Years and Half Years to Twenty Years: they will also serve for

TABLES OF DISCOUNT

AT PROGRESSIVE RATES PER CENT.

commencing at Two and a Half and advancing in that Ratio to Ninety-Seven and a Half per Cent.

THEY EXHIBIT ALSO AT ONE VIEW,

THE AMOUNT OR VALUE OF ANY QUANTITY OF GOODS,
IN QUANTITY, FROM ONE TO TWENTY THOUSAND;

IN VALUE,

from Sixpence, and advancing Sixpence at a time to Twenty Shillings; and at the Foot of each Table, the Aliquot Parts, (viz. $\frac{1}{2}$ th, $\frac{1}{8}$ th, &c.) of Sixpence, a Shilling, &c. which include the Fractional Parts,

ONE QUARTER, TWO QUARTERS, and THREE QUARTERS.

By these Tables may all calculations at Five per Cent be changed into other Rates of Interest;—for instance, if you want to change £27. 10s. Interest at 5 per Cent. into $3\frac{1}{2}$, turn to the proper Table, No. 28. and against £27. 10s. is £19. 5s. the answer.—*Proof*—Multiply the Sum by the Rate, and divide the Product by 5.

Any BROKERAGE OR COMMISSION from $\frac{1}{8}$ th to 5 per Cent. may likewise be produced by taking $\frac{1}{16}$ th of the Interest in these Tables; and Brokerages from $\frac{1}{16}$ th to $\frac{3}{8}$ ths by taking $\frac{1}{16}$ th.

It will be seen that these are the numbered Tables referred to in the preceding pages, and they afford an admirable test for examining the truth of the foregoing calculations.

INTEREST FOR $\frac{1}{2}$ YEAR AT 5 PER CENT.DISCOUNT at $2\frac{1}{2}$ per Cent.5 per Cent changed into $\frac{1}{8}$ th, equal to 9 days.Take $\frac{1}{10}$ th for Brokerage at $\frac{1}{8}$ th, and $\frac{1}{10}$ th for Brokerage at $\frac{1}{8}$ th.

By the foregoing Tables it will be seen that a Farthing on 80 Farthings or 1s. 8d. is $1\frac{1}{4}$ per Cent. a Farthing on 40 Farthings or 10d. is $2\frac{1}{2}$ per Cent. and so on.

If 20 per Cent. on 5s. is wanted, turn to that per Centage, (page 77.) and look for 5s. in the left hand column under C. P. that is Cost Price, then in the column opposite, is 1s. the answer: so if an article costs 5s. and is to be sold at 20 per Cent. profit, 6s. will be the Sale Price.

PROFITS,

FROM $1\frac{1}{4}$ TO 50 PER CENT.

ON SUMS FROM ONE TO FIVE HUNDRED POUNDS.

Note.— $1\frac{1}{4}$ per Cent. is 3d., $2\frac{1}{2}$ per Cent. 6d., and 5 per Cent. is 1s. in the Pound.—*Proof.*—Take a fifth and a twentieth of the Rate, which will give the answer: again, 3d. in the Pound is $1\frac{1}{4}$ per Cent.; 6d. $2\frac{1}{2}$; and 1s. 5 per Cent.—*Proof.*—Multiply the Pence or Shillings by 5, the product under the place of Shillings will be the answer in Pounds, and the product under the place of Pence will be so many times 1s. 8d.

EXAMPLE.

Required the Interest of £80 for 90 days, at $2\frac{1}{2}$ per cent. per annum.

Find in the left hand column £80, opposite to which in the column under the title $2\frac{1}{2}$ per Cent. you have 40. Then turn to the table for 90 days' interest on £40, and you will find 9s. 10½d. which is the interest of £80 for 90 days at $2\frac{1}{2}$ per Cent.

Explanation of the foregoing Tables.

THE Reader will observe, that the Work is divided into the following parts, viz. Brokerages and Commissions from $\frac{1}{10}$ th or 2s. per cent. to £15. per cent.; Tables of Interest at 5 per cent. for any number of Years and Half Years, to Twenty Years, which for the sake of distinction are denominated Numbered Tables; Tables of Profits and Losses from $1\frac{1}{2}$ to 50 per cent.; Tables of Interest at 5 per cent. for Days and Months; and Tables of Interest at 4 per cent. for Days and Months.

For the definition of Brokerage and Commission, refer to pages 1 and 8; the Index to the Tables will be found on page 30.

It will be seen that the Fractions $\frac{1}{10}$ th, $\frac{1}{8}$ th, &c. at the heads of these Tables, are all explained; $\frac{1}{10}$ th being 2s., $\frac{1}{8}$ th 2s. 6d., and so on; the P. over the first column of figures signifies principal; the Shillings are placed in the last column on the right; every Table being drawn out from 1s. to £20,000. A new method is laid down in the centre of each Table for computing them;—Example, Brokerage at $\frac{1}{10}$ th per cent. is produced by taking $\frac{1}{10}$ th of Commission at 2 per cent., as stated in the centre of that Table; also Brokerage at $\frac{1}{8}$ th, by taking $\frac{1}{10}$ th of Discount at $2\frac{1}{2}$ per cent.; observe likewise, that if a Brokerage as low as $1\frac{1}{2}$ d. were wanted, it might be obtained by taking $\frac{1}{10}$ th of Brokerage at $\frac{1}{8}$ th, as stated at the foot of that Table. It will hold good for any other rate where pence and farthings, or shillings, pence, and farthings, are placed at the bottom of any Table.

That these Tables will serve for Interest, will be seen on page 8; they might also serve for Tables of Profits at the rates mentioned;—one of these Tables, see page 4, will serve for reducing American Cents into English currency;—Example, 15 cents are equal to 8d., 100 cents to a dollar, or 4s. 6d. These and the Tables of Profits may likewise be applied to find the value of Exchanges to Ireland;—Example, 5s. English changed into Irish at the exchange of 8 $\frac{1}{3}$ rd per cent. is 5s. 5d.; found thus, turn to Profits at 8 $\frac{1}{3}$ rd, page 75, and against 5s. is 5d., the Principal and Discount added make the Answer.

Three, Six, Nine, and Twelve Months' Interest at the following rates, viz. 1, 1 $\frac{1}{2}$, 2, 2 $\frac{1}{2}$, 3, 3 $\frac{1}{2}$, 4, 4 $\frac{1}{2}$, 5, and 6 per cent. may be found by the Brokerage and Commission Tables; Example,

Months' Interest.		per Ct.	Page.
3	at 1 per cent. is the same as Brokerage at	$\frac{1}{4}$	4
6	$\frac{1}{2}$	6
9	$\frac{3}{4}$	7
12as Commission at	1	8
3	at 1 $\frac{1}{2}$ per cent. is the same as Brokerage at	$\frac{3}{8}$	5
6	$\frac{3}{4}$	7
9as Commission at	1 $\frac{1}{8}$	9
12	1 $\frac{1}{2}$	10
3	at 2 per cent. is the same as Brokerage at	$\frac{1}{2}$	6
6as Commission at	1	8
9	1 $\frac{1}{2}$	10
12	2	12
3	at 2 $\frac{1}{2}$ per cent. is the same as Brokerage at	$\frac{5}{8}$	6
6as Commission at	1 $\frac{1}{4}$	9
9	1 $\frac{5}{8}$	12
12	2 $\frac{1}{2}$	14

Months' Interest.		per Ct.	Page.
3	at 3 per cent. is the same as Brokerage at	$\frac{3}{4}$	7
6as Commission at	$1\frac{1}{2}$	10
9	$2\frac{1}{4}$	13
12	3	16
3	at $3\frac{1}{2}$ per cent. is the same as Brokerage at	$\frac{7}{8}$	7
6as Commission at	$1\frac{3}{4}$	11
9	$2\frac{5}{8}$	15
12	$3\frac{1}{2}$	18
3	at 4 per cent. is the same as Commission at	1	8
6	2	12
9	3	16
12	4	20
3	at $4\frac{1}{2}$ per cent. is the same as Commission at	$1\frac{1}{8}$	9
6	$2\frac{1}{4}$	13
9	$3\frac{3}{8}$	18
12	$4\frac{1}{2}$	22
3	at 5 per cent. is the same as Commission at	$1\frac{1}{4}$	9
6	$2\frac{1}{2}$	14
9	$3\frac{3}{4}$	19
12	5	24
3	at 6 per cent. is the same as Commission at	$1\frac{1}{2}$	10
6	3	16
9	$4\frac{1}{2}$	22
12	6	26

The above are exact.

Again, 73 Days' Interest at 5 per cent. is the same as Commission at 1 per cent.,—146 Days' Interest as Com-

mission at 2 per cent.,—219 Days' Interest as Commission at 3 per cent., and 292 Days' Interest as Commission at 4 per cent.;—these are also exact.

A TABLE showing the Exchange allowed by the Purchaser of a Bill payable at any of the following Number of Days and Months, at 5 per cent. Interest.

9 Days are equal to Brokerage at	$\frac{1}{8}$ per cent.
18	$\frac{1}{4}$
27	$\frac{3}{8}$
36	$\frac{1}{2}$
45	$\frac{5}{8}$
54	$\frac{3}{4}$
63	$\frac{7}{8}$
73 Commission at	1
82	$1\frac{1}{8}$
91	$1\frac{1}{4}$
100	$1\frac{3}{8}$
109	$1\frac{1}{2}$
118	$1\frac{5}{8}$
127	$1\frac{3}{4}$
136	$1\frac{7}{8}$
146	2
155	$2\frac{1}{8}$
164	$2\frac{1}{4}$
173	$2\frac{3}{8}$
182	$2\frac{1}{2}$
191	$2\frac{5}{8}$
200	$2\frac{3}{4}$
209	$2\frac{7}{8}$
219	3
228	$3\frac{1}{8}$
237	$3\frac{1}{4}$

246	Days are equal to Commission at	$3\frac{3}{8}$ per cent.
256	$3\frac{1}{2}$
264	$3\frac{5}{8}$
273	$3\frac{3}{4}$
282	$3\frac{7}{8}$
292	4
301	$4\frac{1}{8}$
310	$4\frac{1}{4}$
319	$4\frac{3}{8}$
328	$4\frac{1}{2}$
337	$4\frac{5}{8}$
346	$4\frac{3}{4}$
355	$4\frac{7}{8}$
365	5

See the Heads of the Numbered Tables.

1	Month equal to Commission at	$\frac{3}{8}$ per Cent.
2	$\frac{7}{8}$
3	$1\frac{1}{4}$
4	$1\frac{3}{8}$
5	$2\frac{1}{8}$
6	$2\frac{1}{2}$
7	$2\frac{7}{8}$
8	$3\frac{1}{8}$
9	$3\frac{3}{4}$
10	$4\frac{1}{8}$
11	$4\frac{3}{8}$
12	5

N. B. It is stated above, that 9 days' Interest at 5 per cent. are equal to $\frac{1}{8}$ th per cent., and 18 days' Interest to $\frac{1}{4}$ th per cent. &c.—these, although not exact, are certainly the nearest number of days that come to those rates.

Any Brokerage or Commission from $\frac{1}{8}$ th to 5 per cent. may be instantly calculated by taking $\frac{1}{16}$ th of the Interest in the Numbered Tables; the Reader will find a Table on page 93, showing $\frac{1}{16}$ th part of any sum of Interest contained in the Numbered Tables, as also on page 94, a Table showing $\frac{1}{16}$ th part. By the latter Table, Brokerages from $\frac{1}{16}$ th to $\frac{1}{8}$ ths may be calculated in a trice.

Brokerages at $\frac{1}{8}$ th might be wrought out thus, as it is 3*d.* on every £10. ;—Multiply the sum by 3, then separate the last figure to the right hand, and it will produce the Answer in pence ;—Example, the Brokerage on £300. at $\frac{1}{8}$ th per cent. is 7*s.* 6*d.*—Proof,

$$\begin{array}{r} \text{£}300 \\ 3 \\ \hline \end{array}$$

90,0 or 7*s.* 6*d.*

when there is a Remainder, multiply by 4, which will give the fractions, by separating the last figure to the right hand as before ;—Example, The Brokerage on £13. at $\frac{1}{8}$ th, is 3*s.* $\frac{3}{4}$ *d.*

$$\begin{array}{r} \text{Proof, } \text{£}13 \\ 3 \\ \hline \end{array}$$

3,9 or 3*s.* $\frac{3}{4}$ *d.*

4

3,6

$$\begin{array}{r} \text{On } \text{£}79 \\ 3 \\ \hline \end{array}$$

23,7 or 1*s.* 11 $\frac{1}{2}$ *d.*

4

2,8

Banker's Commission at $\frac{1}{4}$ th per cent. may be wrought in like manner, only multiply by 6,—because it is 6*d.* on every £10.—Example, Their Commission on £73. would be 3*s.* 7 $\frac{3}{4}$ *d.*

$$\begin{array}{r} \text{Proof, } \text{£}73 \\ 6 \\ \hline \end{array}$$

6

43,8 or 3*s.* 7 $\frac{3}{4}$ *d.*

4

3,2

THE USE OF THE BROKERAGE AND COMMISSION TABLES.

What is the Brokerage on £1210. at $\frac{1}{4}$ th per cent. refer as per Index to page 4, for the answer, viz. £3. 0s. 6d.

What is the Brokerage on £1700. at $\frac{1}{10}$ th per cent. Answer £1. 14s., page 1. A year's Interest on £1700. at $\frac{1}{10}$ th per cent. is the same ;—likewise, the Insurance of £1700. at the same rate.

What is the Insurance of £1000. at £10. 10s. per cent. ? Answer, £105. Found by the Tables thus ;—on page 27, Commission at £10. per cent. on £1000. is £100.—to this add $\frac{1}{10}$ th of £100. which is £5.

At the foot of the Table you will observe 10s. which implies that a rate of 10s. per cent. is produced by taking $\frac{1}{10}$ th of £10. per cent.

In America, accounts are kept in Dollars and Cents, 100 Cents being a Dollar, and 40 Dollars £9.

Reduce 40 Dollars and 40 Cents into Sterling Money?—Answer, £9. 1s. 9½d. Refer first to the Numbered Tables, Table 9, which shows the value of Dollars, against 40 is £9. Secondly, refer to Brokerage at $\frac{2}{10}$ ths, page 4, and against 40 is 1s. 9½d.

Convert £90. English Money into Irish exchange, at par, or 8½rd per cent. ? Answer £97. 10s. see Profits at 8½rd, page 88, against £90. is £7. 10s.—the Principal and Interest added make the Answer.

THE NUMBERED TABLES, OR TABLES OF INTEREST FOR YEARS AND HALF YEARS,

may be applied to a variety of useful purposes, as will be seen on page 31.

First, As they regard Interest for years and half years ; although they are calculated at 5 per cent. you may find the

Interest of any sum at any given rate, by two references.

Example: Is the Interest of £60. required at 4 per cent. for 5 years? first refer to Table 32, at the head of which is placed 5 per cent. changed into 4 per cent., and look for the Principal sum on which the Interest is required ;—in that Table you will find against £60. is £48.—Secondly, Turn to the Table for 5 years, No. 10. and against £48. you find £12., which is the Interest of £60. for 5 years, at 4 per cent.

In many cases one reference may suffice; if you multiply the rate by the time, (take the foregoing Example) 5 (time,) multiplied by 4 (rate,) is equal to 20 per cent., turn to Discount at 20 per cent., Table 8, and against £60. is £12. the Answer.

TO CALCULATE INTEREST FOR MONTHS AT 5 PER CENT.

For every Pound in the Principal, reckon a Penny, and you have a Month's Interest ;—Example, a Month's Interest on £100. is 100*d.* or 8*s.* 4*d.*, of course a Month's Interest on 6*s.* is a farthing, on 10*s.* a half-penny, on 15*s.* three farthings ;—if you want 2, 3, 4, &c. Months' Interest at 5 per cent., multiply the Pounds in the Principal by 2, 3, 4, &c. and the product will be the Answer in pence ; thus, 3 Months' Interest on £100. is 300*d.* or £1. 6*s.*

INTEREST FOR MONTHS AT LOWER RATES THAN 5 PER CENT.

may be easily calculated by the Numbered Tables. Example, If the rate be 2 per cent., turn to Table 16, where 5 per cent. is changed into 2 per cent., and to find a Month's Interest on 1, 2, 3, 4, &c. Pounds, look down the Interest column, and for every 5*s.*, reckon a farthing, for 10*s.* a half-penny, for 15*s.* three farthings, and for every £1. a penny ;—thus a Month's Interest by that Table on £1. is a farthing, on £2. three farthings, on £3. a penny, on £4. three half-pence, and so on ;

then for 2, 3, 4, &c. Months, multiply the Interest by 2, 3, 4, &c. and reckon in the same way. Observe, 3, 6, 9, and 12 Months' Interest at 1, $1\frac{1}{2}$, 2, $2\frac{1}{2}$, 3, $3\frac{1}{2}$, 4, $4\frac{1}{2}$, 5, and 6 per cent. will be found by the Brokerage and Commission Tables as stated above.

TO CALCULATE INTEREST FOR DAYS AT 5 PER CENT. EXACTLY.

Multiply the Sum by the number of Days, and divide by 7300; for 4 per cent., multiply the Sum by the number of Days, and divide by 9125.

Tables of Interest for Days at 4 and 5 per cent. will be found at the end of the Work; the former are drawn out from £1. to £1000., the latter from £1. to £10000.

A ready method of finding the Interest on any Sum at 5 per cent. as high as 36 Days, is as follows;—divide the number of Days by 3, multiply the Sum by that quotient, and after separating one figure to the right, the answer will be in pence;—thus, to find 21 Days' Interest on £20., divide 21 by 3, the quotient will be 7, then multiply £20. by 7, as follows,

$$\begin{array}{r} 20 \\ 7 \\ \hline 140 \end{array}$$

separating one figure on the right the answer is 1s. 2d.; this method is near enough for practice. Again, you may multiply the Sum by the number of Days, and look for a Day's Interest on the product;—suppose you want 30 Days' Interest on £30., multiply

$$\begin{array}{r} 30 \\ \text{by } 30 \\ \hline \end{array}$$

900 Product;

a Day's Interest on £900. by the Tables is 2s. $5\frac{1}{2}$ d.; in case you have no Tables to refer to, you may find a Day's Interest thus,—suppose on £900.—cut off one figure to the right, and

divide the remainder by 3, and the quotient will be the Answer in pence ;—Example,

$$3 \overline{)90,0}$$

30 or 2s. 6d.

but for every 3s. in the Answer, deduct a half-penny.

It is usual with Bankers to charge a 1d. per Day on a £30. Bill ; thus in discounting a Bill for £30. that has 50 days to run, they would call the Discount 4s. 2d., which is a half-penny too much in every 3s., as may be seen in a year's Interest ;

Proof, 365

30

3,0)1095,0

365 Pence—or £1. 10s. 6d.

—but deduct 10 half-pence and it will leave £1. 10s. the real Interest.

By the Numbered Tables and the 5 per cent. Interest Tables, you may find the Interest on any sum at any rate per cent. precisely in the same way as by the small Table inserted on page 96 ; every thing being contained in them which is in that Table ; or you may make any calculations you please at 5 per cent., either for Days, Months, or Years, and change the same into any rate lower, even down to $\frac{1}{8}$ th per cent., as stated at the head of each Table.

Take the following Examples ;—a Banker, who discounts at 5 per cent., would charge £1. for discounting a Bill for £100. that had 73 days to run ; but one who discounts at 4 per cent. would charge only 16s. for discounting the same Bill ; and another who discounts at 3 per cent. would only charge 12s. for discounting the same ;—Proof,—if you turn

to Table 32, where 5 per cent. is changed into 4 per cent., you will find against £1. is 16s. so likewise, if you refer to Table 24, against £1. is 12s.; another proof is,

73 Days' Interest on £100. at 5 per cent. is £1.

73.....£100. at 4 per cent. is 16s.

73.....£100. at 3 per cent. is 12s.

It will be seen by Table 1, that half a year's Interest on 1s. is a farthing, on 2s. a half-penny, and so on; this is obtained by taking $\frac{1}{20}$ th of the Interest on £1., £2., and so on. Brokerage at $\frac{1}{8}$ th per cent. is produced in like manner. On page 93, is a Table for taking $\frac{1}{20}$ th of the Interest in these Tables. Although the Shillings at the foot of these Tables are only carried up to 20, they might have been extended to 20000; and by the Aliquot Parts at the bottom of each Table you may find the Discount or Interest of any No. of Pence;—Example, the Discount on 16s. 8d. at $7\frac{1}{2}$ per cent. is 1s. 3d.; see Profits at $7\frac{1}{2}$ per cent. To find it by the numbered Tables, refer to Table 3;

the Discount on £16.—is £1. 4s. 0d.
in the Aliquot Parts against 6d.—is £0. 0s. 9d.
in the Aliquot Parts against 2d.—is £0. 0s. 3d.

take $\frac{1}{20}$ th of £1. 5s. 0d.

and it is £0. 1s. 3d. the Answer.

A little practice will soon make this easy.

Every one that is in possession of this Book ought to be expert in taking $\frac{1}{20}$ th of any sum. Profits at 5 per cent. show $\frac{1}{20}$ th of any sum,—and it will be seen by them that it is a farthing on every 5d. My method of taking $\frac{1}{20}$ th is very simple, at the same time perfectly correct,—at first sight it may appear a round about method; but practice will convince you it is not so; first then, for pounds, $\frac{1}{20}$ th of £1. is 1s. of

£2. is 2*s.* of £3 is 3*s.* and $\frac{1}{10}$ th of £100. is 100*s.* or £5.—this is nothing more than changing pounds into shillings,—if then $\frac{1}{10}$ th of £1. be 1*s.*, $\frac{1}{10}$ th of 15*s.* must be 9*d.*, $\frac{1}{10}$ th of 10*s.* must be 6*d.*, and $\frac{1}{10}$ th of 5*s.* must be 3*d.*—suppose you want $\frac{1}{10}$ th of 12*s.* 1*d.*, bring it into pence, which is 145*d.*—consider this as shillings, and reckon how many pounds and shillings are contained in 145*s.*, the answer will be £7. 5*s.*, then for every £1. reckon 1*d.*, and for every 5*s.* a farthing, which will be 7½*d.*, and this is $\frac{1}{10}$ th of 12*s.* 1*d.* The whole of the Brokerages and Commissions contained in this Work, from $\frac{1}{8}$ th to 5 per cent. were calculated by this method, without pen or pencil.

It is stated on page 31, that Brokerages from $\frac{1}{10}$ th to $\frac{3}{10}$ ths may be obtained by taking $\frac{1}{10}$ th of the Interest in the Numbered Tables; the taking $\frac{1}{10}$ th is very easy when you can take $\frac{1}{20}$ th, as it is only dividing the sum;—Example, take $\frac{1}{20}$ th of 5*s.*, which is 3*d.*, then divide 3*d.*, which is 1½*d.*, and this is $\frac{1}{10}$ th of 5*s.*, so of any other sum. Observe, these Tables with the Brokerages and Commissions added, will show every rate by eighths to 100 per cent; for instance, if a rate of 99½ths were required, as it might in reckoning the value of Stock, by referring to Discount at 95 per cent. in the Numbered Tables, and then to Commission at 4½ths per cent. you have the rate required.

These Tables show the amount or value of Goods; the Fractions at the head of each Table show some of the readiest methods of calculating the price of Goods;—Example, over the first Table is set $\frac{1}{40}$, therefore, if 750 articles at 6*d.* were wanted, they would come to £18. 15*s.*

Divide 750 by 40, 4,0)75,0

£18. 15*s.*

the Remainder, thirty Sixpences ;

hence, if you want $\frac{1}{40}$ th part of any sum, this Table furnishes the Answer; as $\frac{1}{40}$ th of £100. is £2. 10s., $\frac{1}{40}$ th of 1s. is a farthing, and so on in like manner if $\frac{1}{8}$ th, $\frac{1}{4}$ th, $\frac{3}{8}$ ths, $\frac{1}{2}$, $\frac{5}{8}$ ths, $\frac{3}{4}$ ths, $\frac{7}{8}$ ths, or if $\frac{1}{5}$ th, $\frac{1}{10}$ th, $\frac{1}{20}$ th, $\frac{1}{40}$ ths, $\frac{1}{80}$ ths, $\frac{1}{160}$ ths, &c. of any sum were wanted, refer to these Fractions at the heads of the Tables, and you have the Answer by inspection:—required $\frac{1}{10}$ th of £24., refer to Table 4, against £24. is £2. 8s. The taking $\frac{1}{10}$ th of any sum is so easy, it is not worth while referring to a Table to find it;—Example, suppose you want $\frac{1}{10}$ th of £50., cut off the figure to the right, and £5. remain, which is $\frac{1}{10}$ th of £50. Again, $\frac{1}{10}$ th of £54. is £5. 8s.—this is only separating the 4., and doubling it for shillings, and the remainder is Pounds. Again, take $\frac{2}{5}$ ths of £54. thus, multiply 54
by 2

108 separate the 8 and double it for Shillings, the remainder will be Pounds; then $\frac{2}{5}$ ths of £54. is £10. 16s.

5 per cent. changed into 4 per cent. will be found by a 16s. Table—this may be brought to mind immediately by multiplying the Rate by 4;—you are likewise to take $\frac{1}{20}$ th of a 16s. Table for Commission at 4 per cent. 5 per cent. changed into 1 per cent. will be a 4s. Table; and you are to take $\frac{1}{20}$ th of that Table for Commission at 1 per cent. In like manner 5 per cent. changed into $\frac{1}{8}$ th will be effected by a 6d. Table, because 6d. is $\frac{1}{8}$ th of 4s., or 1 per cent.;—and all the Fractions $\frac{1}{8}$ th, $\frac{1}{4}$ th, $\frac{3}{8}$ ths, $\frac{1}{2}$, $\frac{5}{8}$ ths, $\frac{3}{4}$ ths, $\frac{7}{8}$ ths, are to be reckoned as parts of 4s.; hence, if $\frac{1}{8}$ th be 6d., $\frac{3}{8}$ ths will be 3 sixpences, $\frac{5}{8}$ ths 5 sixpences, and $\frac{7}{8}$ ths 7 sixpences; so if $\frac{1}{4}$ th be a shilling, $\frac{1}{2}$ will be 2 shillings, and $\frac{3}{4}$ ths will be 3 shillings. Lastly, if wanted to change 5 per cent. into $3\frac{3}{8}$ ths, you would refer to a 13s. 6d. Table;—for Example, multiply 3 per cent. by 4, it produces 12s., then for the $\frac{3}{8}$ ths add 3 sixpences.

These Tables show at one glance the amount of Discount on any sum from 1*s.* to £20000. at the several rates of $2\frac{1}{2}$, 5, $7\frac{1}{2}$, &c. to $97\frac{1}{2}$ per cent ;—Example, the amount of Discount on £1000. at 40 per cent. is £400.; refer to Table 16, at the top of which is placed Discount at 40 per cent. Observe, all these Discounts as far as 50 per cent. are repeated under the head Profits.

THE USE OF THE NUMBERED TABLES.

What is $\frac{1}{40}$ th part of £1000.? Answer, £25. see Table 1, $\frac{1}{40}$ th being placed at the head of that Table.

What will half a year's Interest be on £1000. at 5 per cent. ? Answer, £25.; see the same Table.

What is the Brokerage on £1000. at $\frac{1}{8}$ th per cent.? Answer, £1. 5*s.*; take $\frac{1}{20}$ th of £25. or half a year's Interest on £1000.

What is the Brokerage on £1000. at $\frac{1}{16}$ th per cent. Answer 12*s.* 6*d.*, which is $\frac{1}{40}$ th of £25. or half a year's Interest on £1000.

Change £1000. Interest at 5 per cent. into Interest at $\frac{1}{8}$ th per cent., the Answer will be £25.; the Discount on £1000. at $2\frac{1}{2}$ per cent. is likewise £25.; and the Discount on 12*s.* is $3\frac{1}{4}$ *d.*—this is obtained by taking $\frac{1}{20}$ th of the Interest on £12., which is 6*s.*, $\frac{1}{20}$ th of that is $3\frac{1}{4}$ *d.*; the Discount on 12*s.* 6*d.* is $3\frac{3}{4}$ *d.*; look in the Aliquot parts for the value of 6*d.*, add this to 6*s.*, the Interest on £12., then take $\frac{1}{20}$ th of 6*s.* 3*d.*, and it makes the Answer, viz. $3\frac{3}{4}$ *d.*

What is the Interest on £80. for 40 Days, at $\frac{1}{8}$ th per cent.? Answer $2\frac{1}{2}$ *d.*; by Table 1, you find that £80. changed into $\frac{1}{8}$ th, is £2., turn to Interest for Days at 5 per cent. and 40 Days' Interest on £2. is $2\frac{1}{2}$ *d.*

What is £500. Stock worth at $85\frac{1}{2}$? Answer £428. 15*s.*;

see Table 34, Discount at 85 per cent., against £500. is £425., —next turn to Brokerage at $\frac{1}{4}$ ths per cent. and against £500. is £3. 15s., making together £428. 15s., the Answer;—in this way, you may reckon the value of Stock to any amount.

Page 96, is a Table showing how the 5 per cent. Interest Tables may be used for other Rates of Interest;—Example, if 7 Days' Interest on £10. were wanted at $4\frac{1}{2}$ per cent., turn to the 5 per cent. Tables, and look for 7 Days' Interest on £9.; for 4 per cent. look for 7 Days' Interest on £8.; this may be easily committed to memory by doubling the Rates, as $4\frac{1}{2}$ per cent. doubled, is 9; 4 per cent. doubled, is 8; and so on.

The Tables of Profits commence page 73, and end page 92; and will be found of great use to Merchants and others. The Fractions at the head of each Table over the Pounds, may at first sight appear perplexing, but it is possible to simplify them: first, take 5 per cent.; over the Pounds, in that rate is placed $\frac{1}{20}$, hence, $\frac{1}{20}$ th of £1. is 1s., $\frac{1}{20}$ th of £2. is 2s., and so on: it likewise denotes, that it is a farthing on every 20 farthings; that is, it is a farthing on every 5d.; this has been mentioned in another place. Again, over $2\frac{1}{2}$ per cent. is placed $\frac{1}{40}$, hence, $\frac{1}{40}$ th of £1. is 6d., so likewise it is a farthing on every 40 farthings, or 10d.;—the rate below that is $1\frac{1}{4}$, or $\frac{1}{80}$, and $\frac{1}{80}$ th of £1. is 3d., this in like manner is a farthing on every 80 farthings, or 1s. 8d.;—lastly, over $3\frac{3}{4}$ is placed $\frac{2}{30}$, because $1\frac{1}{4}$ is contained in $3\frac{3}{4}$ three times, the same as $1\frac{1}{4}$ d. is contained in $3\frac{3}{4}$ d. three times; therefore if $\frac{1}{80}$ th of £1. be 3d., $\frac{2}{30}$ ths of £1. must be 9d., and if $1\frac{1}{4}$ per cent. be a farthing on every 80 farthings, $3\frac{3}{4}$ must be 3 farthings on every 80 farthings.

Again, a farthing on a farthing is 100 per cent., a farthing on 2 farthings is 50 per cent.; a farthing on 8 farthings is $12\frac{1}{2}$ per cent.;—Example, 100 divided by 1, is 100, and

so on; thus,	1)100(100	2)100(50	8)100(£12.
			96
			4
			20
			8)80(10s.

This it is hoped will be sufficient to open any one's eyes to the Fractions.

Some ready methods might be pointed out for calculating these Profits;—Example, for 5 per cent., take $\frac{1}{20}$ th part of the Sum, thus 5 per cent. on 5s. is 3d.; 5 per cent. on £1. is 1s. For 10 per cent. which is twice 5 per cent., double the sum, then take $\frac{1}{20}$ th;—Example, 10 per cent. on 5s. is 6d.; 10 per cent. on £1. is 2s.; proof,

5s.	£1.
2	2

10s. $\frac{1}{20}$ th is 6d.; £2. $\frac{1}{20}$ th is 2s.; then for 15, 20, 25, 30, 35, 40, 45, and 50 per cent., multiply the sum by 3, 4, 5, 6, 7, 8, 9, and 10, and take $\frac{1}{20}$ th part as before; for $2\frac{1}{2}$ per cent., divide the sum, then take $\frac{1}{20}$ th;—Example, $2\frac{1}{2}$ per cent. on 5s. is $1\frac{1}{2}$ d., and $2\frac{1}{2}$ per cent. on £1. is 6d.;

Divide 5s.

Divide £1.

leaves 2s. 6d. $\frac{1}{20}$ th is $1\frac{1}{2}$ d. leaves 10s. $\frac{1}{20}$ th is 6d. for $12\frac{1}{2}$ per cent. double the sum, and add half the sum, then take $\frac{1}{20}$ th; as $12\frac{1}{2}$ per cent. on 5s. is $7\frac{1}{2}$ d.; $12\frac{1}{2}$ per cent. on £1. is 2s. 6d.

The Examples, &c. already given, it is presumed make it unnecessary to add any thing further by way of explanation.
